

Engineering For Kids puts the FUN in **STEM** learning through hands-on engineering activities for kids **ages 4 - 14**. From designing and constructing rockets, hovering cars, and roller coasters to MinecraftEDU, robotics, video game designing and creating FUN objects using LEGO® bricks.

At Engineering for Kids the quality and diversity of our programs, paired with the passion and talent of our instructors make us the enrichment leader in Calgary. We help children improve on critical thinking and problem solving skills. EFK STEM workshops inspire creativity and foster independent "out of the box" thinking. Each program is designed to offer an exciting, HANDS-ON experience that encourages collaboration and teamwork.

We are always here to help. For more information, please call **Edward at 403-479-0159**.

Girl Guide STEM Workshops (Ages 5-14)

- 90-minute hands-on engineering activity
- EFK comes to your meeting location
- Special Girl Guide pricing is \$200 for up to 12 children plus \$12 for each additional child
- Includes two staff members to run the engineering workshop and all materials
- You choose between an EFK core engineering activity and robotics. There are many, many choices of topics. See www.engineeringforkids.com/programs .
- Children take home their builds if an activity from our core program is selected
